

Remember, it ALL drains to our lakes and rivers

Keep pollution out of storm drains

Storm drains lead to our streams and rivers. So any oil, pet waste, leaves, or dirty water from outside activities that enters a storm drain ends up in our streams and rivers.

How can you help? Keep leaves, grass clippings, and trash away from storm drains. And never dump motor oil, pet waste, or dirty water down the storm drain.

Remember only rain down the drain!
