

Water Usage Information

The average person will use 600 cubic feet of water each quarter. This allows for all cooking, cleaning and laundry needs for one person. A family of 4 can be expected to use an average of 2400 cubic feet of water per quarter. If your water usage is considerably more than the average, contact our office at 498-8114 for water conservation tips and information on how to locate leaks in your plumbing.
